### EXAMINER'S AMENDMENT

1. Examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

The application has been amended as follows:

In the specification:

The first paragraph of the specification has been amended as follows:

-- [0001] This application is a divisional of United States Patent Application No. 09/879,363 filed on June 12, 2001, now United States Patent No. 6,708,687. The disclosure of the above application is incorporated herein by reference. --

2. The following is an examiner's statement of reasons for allowance: Applicant has amended claim 11 to specifically recite that the compressive stress imparted upon the mirror during the cooling of the facet is a result of the facet being heated to a higher temperature than the temperature of the mirror. It is well known in the art to impart compressive stress upon the mirror during the cooling process. However, this has always been accomplished by using a facet that has a different coefficient of thermal expansion than that of the mirror. It is also well known to use similar coefficients of thermal expansion, but applicant is the first to use a method that allows impartation of compression stress during cooling while maintaining similar coefficients of thermal expansion. Each of the independent claims, 11, 14, and 19, articulate that the compressive stress imparted is a result of the temperature difference and not a difference

Art Unit: 1733

between coefficients of thermal expansion. Examiner therefore deems the independent and dependent claims allowable.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance." Claims will be renumbered as necessary.
